

Responsible AI Use Class Agreement

Class: _____ Teacher: _____ Date: _____

Our Learning Community Values

As a class, we believe that meaningful learning happens when we:

- Engage actively with ideas and challenges.
- Think critically about information and sources.
- Support each other's growth and understanding.
- Take responsibility for our choices and actions.
- Approach problems with curiosity and persistence.

Our AI Partnership Principles

We understand that:

1. AI is a thinking partner, not a thinking replacement.
2. AI makes mistakes and is full of biases.
3. Learning requires human effort.

As responsible AI users in this classroom, we commit to:

Transparency and Honesty

- I will be transparent about when and how I use AI for schoolwork.
- I will always be able to explain my work in my own words.
- I will ask my teacher when I'm unsure if AI use is appropriate.
- I will be honest about mistakes and learning opportunities.

Thoughtful Decision-Making

- I will ask myself: "Is AI helping me understand better or doing the work I should be doing?"
- I will use AI to enhance my learning, not avoid it.
- I will verify important information from AI sources.
- I will give credit when AI contributes to my work.

Academic Growth Focus

- I will engage with challenging material even when it's difficult.
- I will use AI to explore ideas, not to skip thinking.
- I will take responsibility for understanding the concepts, not just getting answers.
- I will help my classmates make thoughtful AI choices, too.

When AI Helps vs. When It Doesn't

AI can help me when I need to:

- Research and gather information from multiple perspectives.
- Brainstorm ideas and explore creative possibilities.
- Check my understanding of complex concepts.
- Practice skills with immediate feedback.
- Organize thoughts and structure my work.

I should avoid using AI when:

- The goal is to develop my own thinking on a topic.
- I'm being assessed on my personal knowledge or skills.
- The assignment specifically asks for my original ideas.
- Using AI would prevent me from learning something important.

My Personal Commitment

One area where I want to challenge myself to think independently this semester:

How I will know if my AI use is supporting my learning goals:

If I make a mistake with AI use, I will:

Class Discussion Notes

Our class agreements about AI use:

Questions we want to revisit during the semester:

Signatures

Student Signature: _____ Date: _____

Teacher Signature: _____ Date: _____

This agreement will be revisited and updated throughout the semester as we learn and grow together.
